Eden Furniture are delighted to announce a partnership with StableTable ® to sell their award winning range of products.

StableTable ® is a patented solution to the classical problem with tables that wobble. It is a fully automatic system that needs no manual interaction. Place the table where you want it and it automatically stabilizes by adjusting and locking its legs. Move it somewhere else and it automatically readjusts to the new place. With a mechanical construction inside the pillar, two of the cross legs and their movement is controlled. As soon as equilibrium has been achieved, the construction automatically locks itself. When the table is lifted, the system automatically unlocks itself again and you can place the table where you want and it will again stabilize itself!

Inside the centre pillar, well protected from gravel, dirt or other external influences sits the ingenious mechanical system that allows the legs to move and adjust to the ground while ensuring the correct height of the table. Due to the unique solution the table bases automatically adjust to both placed next to each other.

The tables are produced to the highest quality standards in an ISO-certified factory in Sweden. Our special coating technique ensures that there is no chipping or flaking and the tables can be used outside all year round.

StableTable[®] - Freedom to design!

StableTable[®] are the Swedish table bases that never wobble. No adjustable feet that always needs to be re-adjusted, no folded napkins under the table legs, no more spilt drinks and no more complaining guests. Automatically the table adjust to any uneven ground both in and outdoors. StableTable[®] is internationally recognized and awarded as "the" solution to problems with wobbly tables.

Change to StableTable[®] and forget about wobbly tables forever!

- Automatically self -adjusting
- Manages bumps and grooves
- Manages height differences of up to 20-25mm
- Fully locking system
- Mechanical system that sits well protected inside the centre pillar
- Simple but ingenious mechanical system – no valves, no bladders, no oils
- Not impacted by weather
- Works equally well both in- and outdoors
- Produced in a certified factory in Sweden
- Fully recyclable

End the frustration over wobbly tables and stop wasting time and money.

Studies show that more than 3 minutes are spent per table per day on each wobbly table - with 20 tables that is 6-7 hours per week. Time the staff spend unnecessarily; re-adjusting feet, wiping of spilt drinks, picking up folded menu cards under table legs and listening to complaining guests. This adds up 100-150 pounds lost every week!

A very small sample of our satisfied customers

Abbey Hotel with Allium Restaurant, Bath, UK

StableTable Extreme, stainless steel bases used indoor, StableTable Classic in black used outdoors.

TABLE BASES

StableTable® Classic is suitable for both indoor and outdoor use. The table base is available in three different heights (bar/poseur, dinner/café and lounge) and a number of different sizes for maximum flexibility. **StableTable® Extreme** in stainless steel is created especially for tough and exposed environments. **StableTable® Classic Flip Top** is fitted with a folding mechanism for easy handling and minimum storage space.

TABLE TOPS

The unique, patented StableTable® base can be fitted with any type of table top irrespective of type, shape or quality to create a unique design and atmosphere. There is an unlimited choice of new table tops – or buy the stand on its own for use with existing tops.

PROFITABLE

StableTable® is a simple and smart investment which quickly pays for itself. More seats generate more income. With StableTable® it becomes easy to optimise the use of your seating area in a flexible manner. You will attract and satisfy more customers at a lower cost, and free up time to care for them.

ENVIRONMENTALLY SMART

StableTable® bases are manufactured in a certified factory in Sweden. This makes for short transport distances and efficient deliveries all across Europe. StableTable® products are fully recyclable and produced to the highest quality standards, according to the Scandinavian design tradition.

EASY TO WORK WITH

The smart solution, with its self-adjusting system, makes StableTable® easy to work with. Re-arrange a table for four, into two tables for two, in seconds. Add or move a table without ever having to adjust it. Levelling screws, folded napkins, wobbly tables and complaining customers are all history!

UNIQUE FUNCTIONALITY

The StableTable® base has one fixed and one movable pair of legs. The mechanical system, placed in the pillar, regulates the movement of the legs. As soon as the table stands in a stable position, the legs will automatically lock. Every time the table is lifted, the legs will unlock and the table automatically adjusts to its new position.

StableTable® - No ordinary tables!

StableTable are unique patented self-stabilising table bases for professional use in the hospitality industry. The table bases automatically adjust to any uneven surface and manage height differences of up to 25 mm. No more adjustment screws, folded napkins under table legs or wobbly tables.

Inside the centre pillar, well protected from gravel, dirt or other external influences sits the simple yet ingenious mechanical system that allows the legs to move and adjust to the ground while ensuring the correct height of the table. Due to the unique solution the table bases automatically adjust to both bumps and grooves and also take away approx. 50% of the tilt so that the tables align easier when placed next to each other.

Half-empty tables are annoying and revenue management is important and you need guests on every chair. StableTable table bases are both light and easy to work with and you can easily move your tables around without them starting to wobble. Place two together as a 4-seater and if only two guests arrive pull the tables 10-15cm apart to create separate tables or set them as separate tables and move them together when necessary.

The tables are produced to the highest quality standards in an ISO-certified factory in Sweden. Our special paint technique ensures that there is no chipping or flaking and the tables can be used outside all year round.

StableTable® - Flip Top!

StableTable Classic Flip Top is based on the same unique self-stabilising system as all StableTable bases. In addition, it is fitted with a high-quality flip top mechanism that allows the table top to flip 90 degrees. This makes the tables very compact to store and easy to lift in and out. StableTable Flip Top is the ideal solution for cafés or restaurants with limited storage area or where you move the tables in and out every day.

StableTable Flip Top can be used with round, square and rectangular table tops in sizes from 60 cm up to 80 cm round, 50x50 cm to 70x70 cm square or anything between 50 and 70 cm rectangular. With less than 7 kg of weight and with a built-in handle they are very easy to manage. Simple to flip, easy to lift and efficient to store. Use StableTable Flip Top in- or outside all year around on any type of surface!

Get all the functionality from StableTable self-stabilising tables and the ease of use from a flip top! Store up to 15 bases in the same space as 5 standard bases.

StableTable® unique table bases;

- Fully self-adjusting
- Manage height differences up to 20-25mm
- Work on any uneven surface
- Manages both bumps and groves
- Mechanical system - no valves, no hydraulics, no impact from external factors
- Fully automatic
- Can be used both in- and outdoors
- Make it easier to re-arrange the seating
- Save time
- Lower cost
- More satisfied customers
- Less stressed employees
- Promote increased revenues
- Store up to 15 in the same space as five.
